

Asylum Report

The [Asylum Report: Annual Report on the Situation of Asylum in the European Union](#) is the flagship report of the European Union Agency for Asylum (EUAA).

As a centre of expertise on asylum, the EUAA gathers information on all aspects of the Common European Asylum System (CEAS). To this end, the Asylum Report provides a comprehensive overview of key developments in EU Member States, Iceland, Liechtenstein, Norway and Switzerland (EU+ countries).

The report describes changes to policies, practices and legislation, summarises challenges which persist and highlights key indicators on current trends. Each step of the asylum procedure is described to understand how countries have reacted to changing migratory patterns.

Content is drawn from the EUAA Information and Documentation System (IDS), the [EUAA Case Law Database](#) and over 1,500 sources. To include diverse perspectives, the report draws on contributions from a wide range of additional sources, including national administrations, international organisations, civil society organisations, academia and research institutions.

The Asylum Report covers the period 1 January to 31 December of the reference year. Official statistics from Eurostat are cited, in addition to EU-level data from the EUAA's Early Warning and Preparedness System (EPS) data exchange for additional information and for the section on the Dublin system.
