

Who is Who in International Protection Platform

The [Who is Who in International Protection](#) platform contains interactive maps which map key stakeholders involved in various stages of asylum and reception systems.

The platform presents the roles and responsibilities of key actors involved in international protection in each EU+ country, in addition to their mandates as defined by national policies and legislation. The interlinks between different authorities and institutions are also outlined.

The Who is Who platform is regularly updated with new topics and data visualisations. Some thematic overviews have accompanying reports available in PDF.

The data visualisations present the countries which implement the concepts of a safe country of origin, a safe third country and a European safe third country in order to process an asylum application accordingly.

Overview of countries applying the concept of safe countries

Hover over a country and "click more" to view relevant information about the implementation of safe country concept in each country.

Overview of countries applying the concept of safe third countries

Use the arrows at the top-left corner to navigate to the next data visualisation. Hover over a country and "click more" to view countries which have adopted a list of designated safe countries.

 **Applying the Concept of Safe Countries in the Asylum Procedure**

Example of interactive visualization on countries applying safe country concept

Methodology

Information is gathered through desk research based on publicly-available sources and EUAA reports. Entries are validated by Member States and other stakeholders, if required, for example the EUAA Consultative Forum for information from civil society organisations.

Overview of interactive visualisations

Access

The platform is publicly available: <https://whoiswho.euaa.europa.eu/>
