

Annex IV: List of treatments

This list with treatments is non-exhaustive and illustrates the situation as indicated in the MedCOI Website as of June 2023.

6 minutes-walk distance test
anesthesiology: pain management: e.g., branch block, spinal facet injection, epidural injection
cardiac surgery: cardiac catheterization
cardiac surgery: cardiopulmonary bypass (CPB): heart–lung machine
cardiac surgery: catheter ablation: procedure to remove a faulty electrical pathway of the heart
cardiac surgery: coronary artery bypass grafting (CABG), Bypass
cardiac surgery: correction of Fallot's tetralogy
cardiac surgery: follow up of Carpentier Edwards Perimount bioprosthesis (heart valve)
cardiac surgery: heart valve surgery
cardiac surgery: left ventricular assist device (LVAD)
cardiac surgery: open heart surgery
cardiac surgery: pediatric heart surgery
cardiac surgery: PTCA/PCI ; coronary angioplasty incl follow up
cardiology: maintenance and follow up of ICD by cardiologist
cardiology: maintenance and follow up of pacemaker
cardiology: placement of ICD (Implantable Cardioverter Defibrillator)
cardiology: placement of pacemaker
cardiology: procedure with electrical cardioversion
cardiology: wearable cardioverter defibrillator (like Life Vest)
care for combined mental and physical disabilities: long term institutional 24hr care
care for mental disabilities: day care
care for mental disabilities: long term institutional 24hr care
care for physical disabilities: day care
care for physical disabilities: long term institutional 24hr care
dermatology: (P) UVA skin therapy; radiation with UV-light
dermatology: electrocoagulation
dermatology: laser treatment
dermatology: silicone gel for scars
dermatology: treatment with negative pressure wound therapy (NPWT) VAC-therapy
diagnostic imaging gynaecology: colposcopy
diagnostic imaging gynaecology: hysteroscopy
diagnostic imaging: (Doppler) ultrasound/sonography
diagnostic imaging: angiography (=arteriography)
diagnostic imaging: angiography (=arteriography) cerebral arteries
diagnostic imaging: bone density measurement (DEXA-scan)
diagnostic imaging: bone scan
diagnostic imaging: bronchoscopy
diagnostic imaging: cardiac computed tomography (CT Scan)
diagnostic imaging: cardiac electrophysiology study (EP test/study) to test electrical conduction system of the heart
diagnostic imaging: cardiac stress test
diagnostic imaging: cardiovascular MRI scan

diagnostic imaging: colonoscopy
diagnostic imaging: computed tomography (CT scan)
diagnostic imaging: computed tomography (CT Scan) with contrast
diagnostic imaging: coronarography
diagnostic imaging: ECG (electro cardio gram; cardiology)
diagnostic imaging: EEG (Electro Encephalo Gram)
diagnostic imaging: EMG (Electromyography)
diagnostic imaging: EMNG (Electro Myo Neuro Graphy)
diagnostic imaging: endoscopic retrograde cholangiopancreaticography (ERCP)
diagnostic imaging: endoscopic ultrasound
diagnostic imaging: endoscopy
diagnostic imaging: High Resolution X-Ray imaging
diagnostic imaging: Holter monitor/ ambulatory ECG device(cardiology)
diagnostic imaging: integrated PET/CT- scan
diagnostic imaging: laryngoscopy
diagnostic imaging: mammography
diagnostic imaging: MRI scan
diagnostic imaging: oesophago-gastro-duodenoscopy
diagnostic imaging: optical coherence tomography (OCT)
diagnostic imaging: percutaneous transhepatic cholangiography (PTHC or PTC)
diagnostic imaging: PET- scan
diagnostic imaging: scintigraphy (nuclear medicine)
diagnostic imaging: sigmoidoscopy
diagnostic imaging: Transcranial Doppler (TCD) to measure blood flow in brain blood vessels
diagnostic imaging: transesophageal echocardiogram (TEE)
diagnostic imaging: transvaginal ultrasound/ endovaginal ultrasound
diagnostic imaging: ultrasound of the heart (= echocardiography = echocardiogram = TTE)
diagnostic imaging: ultrasound of thyroid gland/neck region
diagnostic imaging: X-ray radiography
diagnostic test (also as therapy) : pleural puncture (= thoracentesis, pleural tap)
diagnostic test ENT: audiometry
diagnostic test: bone marrow puncture
diagnostic test: brain biopsy
diagnostic test: colon biopsy
diagnostic test: CT guided fine needle aspiration biopsy
diagnostic test: cytological examination of biopsy material
diagnostic test: examination in a sleep laboratory (e.g., polysomnography)
diagnostic test: gastric tissue biopsy
diagnostic test: heart biopsy
diagnostic test: IQ test
diagnostic test: liver biopsy
diagnostic test: lung function tests (e.g., spirometry)
diagnostic test: lymph node biopsy
diagnostic test: measuring of blood oxygen level (e.g., pulse oximetry)
diagnostic test: measuring of blood oxygenation for home use
diagnostic test: mycobacterial culture incl. identification of Mycobacterium species
diagnostic test: PCR test for Mycobacterium Tuberculosis
diagnostic test: renal biopsy
diagnostic test: transient elastography: test for liver fibrosis (e.g., Fibroscan)
ENT: follow up by an audiologist

ENT: hearing aid including repair and replacement
ENT: implantation repair and follow up of Cochlear Implant
ENT: outpatient care in an institute for deaf patients
ENT: teaching of sign language to deaf patients
Feeding: enteral feeding by for example Peptamen or alternative
Feeding: fiber enriched supplements for tube feeding (like brands Nutrison®, Jevity Plus®)
Feeding: liquid food with (pre)dialysis: high energy, low protein, low electrolytes, low phosphate (such as Renilon 4.0)
Feeding: liquid food with (pre)dialysis: high energy, normal protein, low electrolytes, low phosphate (such as Renilon 7.5)
Feeding: nutrition, liquid food high energy, high protein, vitamin and mineral rich
Feeding: nutrition, liquid food, high calories drink
Feeding: nutrition, milk substitute (low allergen amino-based compensation)
Feeding: parenteral feeding by venous catheter for children: Broviac
Feeding: parenteral nutrition infusions: like glucose% fat emulsion% aminoplasmal%
Feeding: phenylalanine-free nutrition (like Anamix® or PKU milupa shake)
Feeding: supplements for children for malnutrition
Feeding: supplements for tube feeding
Feeding: supplements for tube feeding for children below 18 months
Feeding: tube feeding: dosage machine/pump
gastroenterology: enema
gastroenterology: gastrostomy feeding tube: MIC-KEY button
gastroenterology: jejunostomy feeding tube
gastroenterology: nasogastric feeding tube
gastroenterology: paracentesis: procedure to remove ascites (build-up of fluid) from abdomen
gastroenterology: percutaneous treatment of liver hydatid cysts (PEVAC)
gastroenterology: placement and follow up of percutaneous endoscopic gastrostomy(=PEG) feeding tube
gastroenterology: treatment for esophageal varices: endoscopic sclerotherapy
gastroenterology: treatment for esophageal varices: endoscopic variceal banding/ ligation
geriatrics: 24/7 care in a nursing home
gynecology: medical device: vaginal pessary or diaphragm
hematology: blood transfusion
hematology: chelation therapy
hematology: clinical treatment in case of sickle cell crises
hematology: Fresh Frozen Plasma (=FFP) replacements
hematology: phlebotomy / venipuncture / blood collection
hematology: plasmapheresis
hematology: platelets / thrombocytes transfusion
hematology: serologic testing of blood types (A, B, O, rhesus, +/-)
hematology: transfusion of erythrocytes/red blood cells
hematology: treatment with antithymocyte globulin
home care: care at home by a nurse
home care: care at home for patients with visual impairments
hyperbaric oxygen therapy (HBOT)
inpatient treatment by a (intervention) radiologist
inpatient treatment by an allergologist
inpatient treatment by a cardiac surgeon
inpatient treatment by a cardiologist

inpatient treatment by a child psychologist
inpatient treatment by a clinical immunologist
inpatient treatment by a dermatologist
inpatient treatment by a dietitian
inpatient treatment by a gastroenterologist
inpatient treatment by a geriatric specialist
inpatient treatment by a gynecologist
inpatient treatment by a hematologist
inpatient treatment by a hepatologist
inpatient treatment by a HIV specialist
inpatient treatment by a microbiologist
inpatient treatment by a nephrologist
inpatient treatment by a neurologist
inpatient treatment by a neurosurgeon
inpatient treatment by a pediatric cardiac surgeon
inpatient treatment by a pediatric cardiologist
inpatient treatment by a pediatric hematologist
inpatient treatment by a pediatric nephrologist
inpatient treatment by a pediatric neurologist
inpatient treatment by a pediatric neurosurgeon
inpatient treatment by a pediatric oncologist
inpatient treatment by a pediatric ophthalmologist
inpatient treatment by a pediatric orthopedic surgeon
inpatient treatment by a pediatric physical therapist
inpatient treatment by a pediatric psychiatrist
inpatient treatment by a pediatric pulmonologist
inpatient treatment by a pediatric rheumatologist
inpatient treatment by a pediatric surgeon
inpatient treatment by a pediatric urologist
inpatient treatment by a pediatrician
inpatient treatment by a pediatrician specialized in metabolic diseases
inpatient treatment by a physical therapist
inpatient treatment by a plastic surgeon
inpatient treatment by a psychiatrist
inpatient treatment by a psychologist
inpatient treatment by a pulmonologist
inpatient treatment by a rehabilitation medicine specialist
inpatient treatment by a rheumatologist
inpatient treatment by a surgeon
inpatient treatment by a thoracic surgeon
inpatient treatment by a tuberculosis specialist
inpatient treatment by a vascular surgeon
inpatient treatment by an anesthesiologist e.g. pain management
inpatient treatment by an ear nose and throat (ENT) specialist
inpatient treatment by an endocrine surgeon
inpatient treatment by an endocrinologist
inpatient treatment by an infectiologist
inpatient treatment by an internal specialist (internist)
inpatient treatment by an obstetrician
inpatient treatment by an occupational therapist

inpatient treatment by an oncologist
inpatient treatment by an ophthalmologist
inpatient treatment by an oral / dental surgeon
inpatient treatment by an orthopedist / orthopedic surgeon
inpatient treatment by a urologist
inpatient treatment by pediatric rehabilitation specialist
institutions / school for blind people
Intensive care treatment (ICU)
laboratory test blood: INR e.g., in case of acenocoumarol anticoagulation
laboratory test HIV: CD4 count
laboratory test HIV: viral load
laboratory test liver: Fibrotest; incl. 6 serum markers: alpha-2-macroglobulin, haptoglobin, apolipoprotein A1, gamma GT, total bilirubin, ALAT
laboratory test: acid-base balance in blood and urine: blood and urine pH
laboratory test: alkaline phosphatase
laboratory test: alpha-fetoprotein (AFP)
laboratory test: ammonia levels
laboratory test: bacterial cultures
laboratory test: blood ACTH (Adrenocorticotropic Hormone) level
laboratory test: blood count related to leukemia
laboratory test: blood glucose (incl: HbA1C/ glyc.Hb)
laboratory test: blood test for renin + aldosterone
laboratory test: cardiac biomarker: creatine kinase MB (CK-MB)
laboratory test: cardiac biomarker: troponin
laboratory test: CMV DNA testing
laboratory test: coagulation tests
laboratory test: coagulation tests: prothrombin time (PT)
laboratory test: coagulation: activated partial thromboplastin time (aPTT/ APTT)
laboratory test: cortisol levels in blood
laboratory test: C-reactive protein (CRP)
laboratory test: creatine kinase (CK) = creatine phosphokinase (CPK)
laboratory test: D-dimer
laboratory test: e.g., testosterone level, sex hormone-binding globulin, free androgen index
laboratory test: electrolytes: sodium, calcium, potassium, chloride, phosphate, and magnesium
laboratory test: estrogen + progesterone blood levels
Laboratory test: factor VIII activity + factor VIII inhibitor
laboratory test: fecal calprotectin: stool test for intestinal inflammation/ disease activity
laboratory test: FSH and LH (gonadotropic hormones)
laboratory test: GH (growth hormone/somatropin/HGH)
laboratory test: glucose tolerance test
laboratory test: gynecology: cervical Pap smear
laboratory test: HBV DNA testing in case of Hepatitis B
laboratory test: HCV antibody in case of Hepatitis C
laboratory test: HCV genotype (hepatitis C)
laboratory test: HCV RNA test [hepatitis C]
laboratory test: Hep B serology
laboratory test: Hepatitis B antibodies: HBsAb, HBeAb, HBcAb
laboratory test: Hepatitis B antigens: HBsAg, HBeAg
laboratory test: IGF-1 serum concentrations
laboratory test: Ischemia Modified Albumin (IMA) levels

laboratory test: kidney function overall index: Glomerular Filtration Rate (GFR)
laboratory test: lipid profile (total cholesterol, HDL cholesterol, LDL cholesterol, triglycerides)
laboratory test: liver function (PT, albumin, bilirubin, transaminases: ASAT(=SGOT), ALAT(=SGPT) etc.)
laboratory test: measuring arterial blood gas for arterial pH, pCO₂, "base excess", arterial oxygen saturation
laboratory test: medication level in the blood
laboratory test: medication level in the blood for azathioprine
laboratory test: medication level in the blood for ciclosporin
laboratory test: medication level in the blood for clozapine
laboratory test: medication level in the blood for everolimus
laboratory test: medication level in the blood for imatinib
laboratory test: medication level in the blood for lithium carbonate
laboratory test: medication level in the blood for mitotane
laboratory test: medication level in the blood for mycophenolate (=mycophenolic acid)
laboratory test: medication level in the blood for mycophenolate mofetil
laboratory test: medication level in the blood for sirolimus
laboratory test: medication level in the blood for tacrolimus
laboratory test: monitoring full blood count: e.g., Hb, WBC & platelets
laboratory test: monitoring PCR
laboratory test: monitoring phenylalanine in the blood
laboratory test: monitoring tyrosine in the blood
laboratory test: pancreas function (amylase, lipase)
laboratory test: plasma and urinary osmolality
laboratory test: Plasma antidiuretic hormone (ADH) level
laboratory test: prolactin
laboratory test: PTH, calcium, phosphate
laboratory test: related to leukemia: flow cytometry
laboratory test: related to rheumatologic diseases (like RA, ANA, anti-CCP)
laboratory test: renal/kidney function (creatinin, ureum, proteinuria, sodium, potassium levels)
laboratory test: resistance test: antiretroviral drugs
laboratory test: resistance test: tuberculosis drugs
laboratory test: reticulocytes counting in blood
laboratory test: serum amino acids (e.g., branched chain amino acids, phenylalanine, lysine)
laboratory test: serum copper and zinc levels
laboratory test: serum ferritin
laboratory test: serum iron and total iron-binding capacity (TIBC)
laboratory test: sputum smear microscopy (tuberculosis)
laboratory test: stool culture
laboratory test: thyroid functions (TSH, T₃, T₄)
laboratory test: transferrin saturation
laboratory test: tumor marker: BCR-ABL (leukemia)
laboratory test: tumor marker: CA 125 (e.g., monitoring effect ovarian cancer treatment)
laboratory test: tumor marker: CA 15-3
laboratory test: tumor marker: calcitonin
laboratory test: tumor marker: CEA (Carcinoembryonic antigen)
laboratory test: tumor marker: LDH (= lactate dehydrogenase)
laboratory test: tumor marker: PSA test (Prostate-Specific Antigen)
laboratory test: tumor marker: thyroglobulin (=Tg) (thyroid cancer)
laboratory test: urine cytology

laboratory test: urine specific gravity test
laboratory test: urine test for proteinuria
laboratory test: urine test: 24-hour urinary free cortisol excretion
laboratory test: urine test: blood in urine/hematuria
laboratory test: urine test: glucose/glucosuria
laboratory test: urine tests: opioids/amphetamines/cocaine/marihuana
laboratory test: urine; copper determination urine 24 hours
laboratory test: viral load for Hep C
laboratory test: viremia of hepatitis D + HBs Ag
laboratory test: vitamin levels (like vit D)
medical devices dermatology: compression stockings for varicose veins
medical devices dermatology: different types of bandages
medical devices ENT: cuff pressure gauge/ manometer
medical devices ENT: dental prosthesis
medical devices ENT: patch for sealing tracheal stoma
medical devices ENT: speech prosthesis (like Provox or other)
medical devices gastroenterology: stoma materials with ostomy
medical devices internal medicine: blood glucose meter for self use by patient.
medical devices internal medicine: blood glucose self test strips for use by patient.
medical devices internal medicine: continuous glucose monitoring (CGM) implanted device
medical devices internal medicine: epinephrine (=adrenaline) auto-injector
medical devices internal medicine: flash glucose monitoring (FGM) implanted device
medical devices internal medicine: insulin pump
medical devices internal medicine: i-Port Advance (device; insulin portal)
medical devices internal medicine: self-carried pump for subcutan. insulin infusion
medical devices nephrology: tube/catheter and urine bag with nephrostomy
medical devices neurology: pediatric helmet
medical devices ophthalmology: contact lense
medical devices ophthalmology: glasses
medical devices ophthalmology: glaucoma drainage device
medical devices ophthalmology: glaucoma drainage device; Baerveldt
medical devices ophthalmology: loupe
medical devices orthopedics: Becker hip abduction orthosis
medical devices orthopedics: Tübingen hip abduction orthosis
medical devices orthopedics: adapted corset seats for children
medical devices orthopedics: ankle-foot orthosis
medical devices orthopedics: crutches
medical devices orthopedics: foot abduction brace
medical devices orthopedics: full body support orthosis
medical devices orthopedics: hand orthosis
medical devices orthopedics: knee orthosis
medical devices orthopedics: knee-ankle-foot orthosis
medical devices orthopedics: lower and upper limb orthoses
medical devices orthopedics: orthopedic insoles
medical devices orthopedics: orthopedic shoes
medical devices orthopedics: Pavlik harness orthosis
medical devices orthopedics: spinal or corsetbrace
medical devices orthopedics: walking aid such as a walker or a cane
medical devices orthopedics: wheeled walker (" rollator")
medical devices pulmonology pediatrics: Mucoclear® (6% NaCl solution) for nebulizer

medical devices pulmonology: cough assist machine (coughlator)
medical devices pulmonology: BiPAP therapy
medical devices pulmonology: BiPAP therapy for home use
medical devices pulmonology: breathing machines (ventilator, respirator etc)
medical devices pulmonology: CPAP maintenance and repair
medical devices pulmonology: CPAP therapy
medical devices pulmonology: CPAP therapy for home use
medical devices pulmonology: nebulizer
medical devices pulmonology: neonatal CPAP therapy
medical devices pulmonology: neonatal CPAP therapy for home use
medical devices pulmonology: oxygen therapy with device and nasal catheter
medical devices pulmonology: oxygen therapy with O2 pressure tank
medical devices pulmonology: phrenic stimulator (including check-up and maintenance)
medical devices pulmonology: spacer (with mask) for inhaler with asthma medication
medical devices urology: (adult) diapers
medical devices urology: condom catheter
medical devices urology: indwelling urinary catheter like Foley catheter
medical devices urology: stoma materials with urostomy
medical devices urology: suprapubic catheter
medical devices urology: urine catheter
medical devices: (electric) profiling bed with cost sides
medical devices: anti decubitus mattresses and cushions
medical devices: bath seat for patients in a wheelchair
medical devices: electric wheelchair
medical devices: ENT; mandibular (advancement) splint for : eg obstructive sleep apnea, snoring.
medical devices: patient lift; like a sling lift or sit-to-stand lift
medical devices: portable mucous suction
medical devices: wheelchair
medical devices; mobile hoist
medication pill organizer: pill container/ pill box storing scheduled doses
medication pill organizer: prepacked bags in daily doses
medication toxicity surveillance
Neonatal Intensive Care Unit (NICU)
nephrology: acute hemodialysis
nephrology: chronic hemodialysis
nephrology: peritoneal dialysis
nephrology: placement and follow up of nephrostomy
nephrology; Hemodiafiltration (combination of hemodialysis & hemofiltration)
neurology: (spinal tap) lumbar puncture
neurology: implanted baclofen pump for release into spinal fluid
neurology: intrathecal administration of medicine
neurology: nerve conduction velocity test (NCV)
neurology: rehabilitation clinic with 24/7 care (e.g. after CVA or accident)
neurology: Vagus Nerve Stimulation (VNS) incl. implantation, repair and follow up
neurology: visual evoked potentials
neurosurgery: deep brain stimulation incl. implantation, repair and follow up
neurosurgery: neurosurgical treatment of epilepsy
neurosurgery: Placement of cerebral shunt including pre- and after care
neurosurgery: stereotactic radiosurgery/ radiation e.g. with Linea Gamma Knife
nursing home physician

oncology: after care for allogeneic stem cell (=bone marrow) transplantation
oncology: allogeneic stem cell (=bone marrow) transplantation, including pre- and aftercare
oncology: autologous stem cell (=bone marrow) transplantation, including pre- and aftercare
oncology: Carbon ion radiotherapy
oncology: cryosurgery (also called cryotherapy)
oncology: Cyber Knife Radiosurgery
oncology: Hyperthermia Cancer Treatment
oncology: immunotherapy; donor lymphocyte (or leukocyte) infusion (DLI)
oncology: molecular radiotherapy
oncology: nuclear medicine
oncology: nuclear medicine: 177Lutetium DOTATATE therapy
oncology: nuclear medicine: Iodine-131 metaiodobenzylguanidine (131I-MIBG) therapy
oncology: radiation therapy
oncology: radiation; Intensity Modulated Radiation Therapy (IMRT)
oncology: radiation; Volumetric Modulated Arc Therapy (VMAT)
oncology: Selective Internal Radiation Therapy (SIRT)
oncology: sessions with administration of specific intravenous chemotherapy/immunotherapy-
medicines
oncology: terminal and palliative care
oncology; radiation therapy; Brachytherapy (Internal Radiation Therapy)
oncology; radioactive iodine therapy
ophthalmology: intravitreal injections with medication
ophthalmology: cataract surgery
ophthalmology: devices blind patients: e.g., Braille typewriters/computers, canes, 'talking' devices
ophthalmology: eye prosthesis (delivery, placement and follow up)
ophthalmology: laser treatment of diabetic retinopathy
orthopedic surgery: scoliosis surgery
orthopedic surgery: spine cement injection therapy(vertebroplasty)
orthopedic surgery: MUTARS® -XPAND- growing prosthesis (incl follow up)
orthopedic surgery: prosthesis; prosthetic arm (incl maintenance and follow up)
orthopedic surgery: prosthesis; prosthetic foot (incl maintenance and follow up)
orthopedic surgery: prosthesis; prosthetic leg (incl maintenance and follow up)
outpatient care and follow up by a pediatric neurosurgeon
outpatient care by social worker
outpatient treatment and follow up by a allergologist
outpatient treatment and follow up by a cardiac surgeon
outpatient treatment and follow up by a cardiologist
outpatient treatment and follow up by a child psychologist
outpatient treatment and follow up by a clinical immunologist
outpatient treatment and follow up by a dentist
outpatient treatment and follow up by a dermatologist
outpatient treatment and follow up by a dietitian
outpatient treatment and follow up by a gastroenterologist
outpatient treatment and follow up by a geriatric specialist
outpatient treatment and follow up by a gynecologist
outpatient treatment and follow up by a hematologist
outpatient treatment and follow up by a hepatologist
outpatient treatment and follow up by a HIV specialist
outpatient treatment and follow up by a nephrologist
outpatient treatment and follow up by a neurologist

outpatient treatment and follow up by a neurosurgeon
outpatient treatment and follow up by a pediatric cardiac surgeon
outpatient treatment and follow up by a pediatric cardiologist
outpatient treatment and follow up by a pediatric hematologist
outpatient treatment and follow up by a pediatric nephrologist
outpatient treatment and follow up by a pediatric neurologist
outpatient treatment and follow up by a pediatric oncologist
outpatient treatment and follow up by a pediatric ophthalmologist
outpatient treatment and follow up by a pediatric orthopedic surgeon
outpatient treatment and follow up by a pediatric physical therapist
outpatient treatment and follow up by a pediatric psychiatrist
outpatient treatment and follow up by a pediatric pulmonologist
outpatient treatment and follow up by a pediatric rehabilitation specialist
outpatient treatment and follow up by a pediatric rheumatologist
outpatient treatment and follow up by a pediatric surgeon
outpatient treatment and follow up by a pediatric urologist
outpatient treatment and follow up by a pediatrician
outpatient treatment and follow up by a pediatrician specialized in metabolic diseases
outpatient treatment and follow up by a physical therapist
outpatient treatment and follow up by a plastic surgeon
outpatient treatment and follow up by a psychiatrist
outpatient treatment and follow up by a psychologist
outpatient treatment and follow up by a pulmonologist
outpatient treatment and follow up by a rehabilitation medicine specialist
outpatient treatment and follow up by a rheumatologist
outpatient treatment and follow up by a specialist in metabolic diseases
outpatient treatment and follow up by a speech therapist
outpatient treatment and follow up by a surgeon
outpatient treatment and follow up by a thoracic surgeon
outpatient treatment and follow up by a tuberculosis-specialist
outpatient treatment and follow up by a vascular surgeon
outpatient treatment and follow up by an anesthesiologist e.g. pain management
outpatient treatment and follow up by an ear nose and throat (ENT) specialist
outpatient treatment and follow up by an endocrine surgeon
outpatient treatment and follow up by an endocrinologist
outpatient treatment and follow up by an infectiologist
outpatient treatment and follow up by an internal specialist (internist)
outpatient treatment and follow up by an obstetrician
outpatient treatment and follow up by an occupational therapist
outpatient treatment and follow up by an oncologist
outpatient treatment and follow up by an ophthalmologist
outpatient treatment and follow up by an oral / dental surgeon
outpatient treatment and follow up by an orthodontist
outpatient treatment and follow up by an orthopedist / orthopedic surgeon
outpatient treatment and follow up by an orthoptist
outpatient treatment and follow up by a urologist
outpatient treatment and follow up first line doctor; eg family doctor, general practitioner
outpatient treatment care and follow up by an ostomy nurse
outpatient treatment, diagnostics and counseling by clinical geneticist
pediatric care, such as day care

pediatric care: multidisciplinary evaluation by various specialists
pediatrics: special schooling
pediatrics: special schooling for children with hearing impairment
pediatrics: special schooling for mental disabilities
phototherapy for psoriasis
physical therapy: lymph drainage therapy
physical therapy: supervised walking therapy (for claudication)
Placement of central venous catheter: a peripherally inserted central catheter (= PICC) to administer nutrition and/or medication (e.g., chemotherapy)
Placement of central venous catheter: a port catheter (such as Portacath®) to administer nutrition and/or medication (e.g., chemotherapy)
Prothrombin time (PT) , partial thromboplastin time (PTT) & International normalized ratio (INR)
psychiatric clinical treatment (short term) by a psychiatrist
psychiatric clinical treatment in a closed ward/setting (not necessarily forced admittance)
psychiatric crisis intervention in case of suicide attempt
psychiatric crisis intervention in case of suicide attempt including gastric lavage /stomach irrigation
psychiatric forced admittance in case necessary
psychiatric long term clinical treatment (e.g. for chronic psychotic patients) by a psychiatrist
psychiatric long term outpatient treatment by a psychiatrist
psychiatric treatment by means of psychotherapy: cognitive behavioural therapy
psychiatric treatment by means of psychotherapy: other than cognitive behavioural therapy
psychiatric treatment in the form of day care
psychiatric treatment in the form of ECT (Electro Convulsive Therapy)
psychiatric treatment in the form of family therapy
psychiatric treatment in the form of family therapy (as inpatient or clinical treatment)
psychiatric treatment in the form of group therapy (target group of similar patients)
psychiatric treatment of alcohol drug addiction in specialized clinic (detox.)
psychiatric treatment of drug addiction in a specialized clinic (rehab.)
psychiatric treatment of drug addiction; outpatient care
psychiatric treatment of PTSD by means of cognitive behavioural therapy
psychiatric treatment of PTSD by means of EMDR
psychiatric treatment of PTSD by means of narrative exposure therapy
psychiatric treatment of PTSD: related to sexual violations
psychiatric treatment: assisted living / care at home by psychiatric nurse
psychiatric treatment; forensic psychiatry
psychiatry : home visits by psychiatrist
psychiatry: antipsychotic medication administration by injection (depot)
psychiatry: treatment of sexual problems (psychotherapy) by psychologist
pulmonology: assisted cough techniques; air stacking therapy and training
rehabilitation: long-term cardiac rehabilitation
rehabilitation: short-term cardiac rehabilitation
schooling: follow up by a remedial educationalist
Serum brain natriuretic peptide (BNP)
specialist in pediatric HIV (in - and outpatient)
surgery : specifically endocrine surgery (eg for [para]thyroid carcinoma)
surgery : specifically orthopaedic surgery; hip replacement
surgery : specifically renal/kidney surgery
surgery : specifically surgery; parathyroidectomy with follow up
surgery : specifically venesection(s) for cyto-reduction (e.g. in case of too high hemoglobin)
surgery, specifically craniofacial surgery

surgery, specifically ENT surgery: tracheotomy including placing of tracheal tube and aftercare
surgery, specifically fundoplication surgery for gastro-oesophageal reflux disease
surgery, specifically ophthalmological surgery: laser treatment
surgery, specifically ophthalmological surgery
surgery, specifically ophthalmological surgery: lense implantation and vitrectomy
surgery, specifically oral & maxillofacial surgery
surgery, specifically orthopaedic surgery concerning a prosthetic knee
surgery, specifically orthopaedic surgery of the spine
surgery, specifically orthopaedic surgery: infiltration of joint with corticosteroids
surgery, specifically orthopaedic surgery: infiltration of joint with hyaluronic acid
surgery, specifically orthopaedic surgery: tibial head surgery for gonarthrosis
surgery, specifically orthopaedic surgery; arthroscopy (e.g. for meniscus)
surgery, specifically orthopaedic surgery; fibular transfer
surgery, specifically orthopaedic surgery; hand surgery
surgery, specifically orthopaedic surgery; knee; Eight-Plate procedure
surgery, specifically pediatric surgery
surgery, specifically reconstructive surgery by a plastic surgeon
surgery, specifically Transjugular Intrahepatic Portosystemic Shunt (TIPS)
surgery: CO2 laser surgery
Surgery: prostate resection (transurethral resection of the prostate, Laparoscopic prostatectomy..)
surgery: specific gastrointestinal: ileostomy
surgery: specific gastrointestinal; (segmental) duodenal resection
surgery: specific gastrointestinal; correction/modification of a jejunostoma
surgery: specific gastrointestinal; Whipple operation/procedure
surgery: specifically gastrointestinal surgery
surgery: specifically gastrointestinal: to restore bile drainage
surgery: specifically gastrointestinal; bariatric surgery (weight loss)
surgery: specifically gynecological surgery: hysterectomy (removal of uterus)
surgery: specifically gynecological surgery; caesarean section (with complications like myoma)
surgery: specifically gynecological surgery; curettement/curettagge/excochleation
surgery: specifically gynecological surgery; for myoma
surgery: specifically gynecological surgery; laparoscopy
Surgery: specifically laparoscopy for undescended testicles
surgery: specifically oncological surgery
Surgery: specifically orchidopexy (for undescended testicles)
surgery: specifically orthopaedic surgery; knee replacement
surgery: specifically reconstructive surgery; larynx and trachea
surgery: specifically transgender operation incl pre- and after care
surgery: specifically urologic surgery
Surgery: specifically Urologic Surgery: Prostate resection (transurethral resection of the prostate=Laparoscopic prostatectomy)
surgery: specifically vascular surgery
surgery: splenectomy
surgery: vascular surgery; embolization procedure to stop a bleeding in or near the tumor or aneurysm
surgery; specifically gastrointestinal: colostomy operation and closure
surgical placement of a shunt through jugular vein for hemodialysis
surgical placement of an arterial shunt for hemodialysis
transplantation aftercare: treatment of graft rejection
transplantation by parathyroid auto transplantation including pre and after care
transplantation of cornea including all pre- and aftercare

transplantation of heart including all pre- and aftercare
transplantation of kidney including all pre- and aftercare
transplantation of liver including all pre- and aftercare
transplantation of lung(s) including all pre- and aftercare
transplantation of osteochondral, autologous, including all pre- and aftercare
transplantation of pancreas including pre- and aftercare
transplantation of skin including all pre- and aftercare
Ultrasound imaging of the abdomen
urology: diagnostics: cystometry
urology: diagnostics: cystoscopy
urology: imaging: cystography
urology: operative removal of kidney stones (general surgery)
urology: percutaneous nephrolithotomy (PCNL; operative removal of kidney stones)
urology: placement and follow up of ureter stents
urology: prostate resection (transurethral resection of the prostate, laparoscopic prostatectomy)
urology: ureteroscopy and laser lithotripsy (LL; removal of kidney stones)
urology: urotherapist (nurse practitioner or physiotherapist specialized in child urology)
urology; extracorporeal shock wave lithotripsy (ESWL; removal of kidney stones)
urology; intra-uretral lithotripsy (with uretroscopy and ultrasound) by local shock waves
