

ANNEX IV: LIST OF TREATMENTS AND SPECIALISMS

The lists below are not exhaustive and present the situation as indicated in MedCOI Website as of November 2018.

List of Treatments

24/7 care in a nursing home
adjustment for all orthopedic devices
aid devices for blind people such as Braille typewriters or computers, canes, 'talking' products, clocks ...
cardiac surgery ; cardiac catheterization
cardiac surgery: follow up of Carpentier Edwards Perimount bioprothesis (heart valve)
cardiac surgery: heart valve surgery
cardiac surgery: morrow operation
cardiac surgery: procedure alcohol septal ablation
cardiac surgery; cardiopulmonary bypass (CPB) ; heart–lung machine
cardiac surgery; Coronary artery bypass grafting (CABG), Bypass
cardiac surgery; correction of Fallot's tetralogy;
cardiac surgery; left ventricular assist device (LVAD)
cardiac surgery; open heart surgery
cardiac surgery; pediatric heart surgery
cardiac surgery; PTCA/PCI ; coronary angioplasty incl follow up
cardiology, follow up of ICD by Cardiologist
cardiology, maintenance and follow up of pacemaker
cardiology, placement of ICD (Implantable Cardioverter Defibrillator)
Cardiology, wearable cardioverter defibrillator (like Life Vest)
cardiology: placement of pacemaker
care for combined mental and physical handicapped: long term institutional around the clock care
care for mentally handicapped: day care
care for mentally handicapped: long term institutional around the clock care
care for mentally handicapped: sheltered housing with 24 hour care
care for physically handicapped: day care
care for physically handicapped: long term institutional around the clock care
check up by cystoscopy
dermatology: (P) UVA skin therapy; radiation with UV-light
dermatology: silicone gel for scars
dermatology: treatment with negative pressure wound therapy (NPWT) VAC-therapy.
diagnostic imaging : angiography (=arteriography)
diagnostic imaging : bronchoscopy
diagnostic imaging : laryngoscopy
diagnostic imaging by Doppler ultrasound/ sonography
diagnostic imaging by means of a oesophago- gastro-duodenoscopy
diagnostic imaging by means of bone density measurement (DEXA-scan)
diagnostic imaging by means of bone scan
diagnostic imaging by means of cardiac stress test

diagnostic imaging by means of colonoscopy
diagnostic imaging by means of computed tomography (CT Scan)
diagnostic imaging by means of computered tomographt (CT Scan) with contrast
diagnostic imaging by means of coronarography
diagnostic imaging by means of EEG (Electro Encephalo Gram)
diagnostic imaging by means of EMG (Electro Myography)
diagnostic imaging by means of EMNG (Electro Myo Neuro Graphy)
diagnostic imaging by means of endoscopy
diagnostic imaging by means of Fibroscan (transient elastography; test for liver fibrosis)
diagnostic imaging by means of High Resolution X-Ray imaging
diagnostic imaging by means of Holter monitor/ ambulatory ECG device(cardiology)
diagnostic imaging by means of integrated PET/CT- scan
diagnostic imaging by means of isotopic ventriculography
diagnostic imaging by means of mammography
diagnostic imaging by means of MRI
diagnostic imaging by means of PET-scan
diagnostic imaging by means of radioisotope renography
diagnostic imaging by means of specific transesophageal echocardiogram, or TEE ; cardiology.
diagnostic imaging by means of ultrasound
diagnostic imaging by means of ultrasound of the heart
diagnostic imaging by means of ultrasound/echography of thyroid gland and neck region
diagnostic imaging by means of x-ray radiography
diagnostic imaging by scintigraphy (nuclear medicine)
diagnostic imaging by Transcranial Doppler (TCD) to measure blood flow through brain's blood vessels.
diagnostic imaging in gynaecology; colposcopy
diagnostic imaging: ECG (electro cardio gram; cardiology)
diagnostic research by echocardiography
diagnostic research, in the form of liver biopsy
diagnostic research, in the form of lung function tests
diagnostic research, in the form of renal biopsy
diagnostic research: blood CEA (Carcino Embryogenic Antigen) marker
diagnostic research: bone marrow puncture
diagnostic research: cytological examination of biopsy material by pathologist
diagnostic research: EBUS-FNA (endobronchial ultrasound fine needle aspiration)
diagnostic research: EUS-FNA (endoscopic ultrasound fine needle aspiration)
diagnostic research: fine needle biopsy aspiration under CT guidance
diagnostic research: lymph node punction
diagnostic research: measuring blood oxygen/ arterial blood gas (Astrup)
diagnostic research: measuring of blood oxygenation for home use
diagnostic research: mediastinoscopy
diagnostic research: pleural puncture(thoracentesis, pleural tap)
diagnostic research: PSA test (Prostate Specific Antigen)
diagnostic research: transient elastography; test for liver fibrosis (eg Fibroscan)
diagnostic research: urine cytology
ENT: audiometry (hearing test)
ENT: hearing aid including repair and replacement
ENT: implantation repair and follow up of Cochlear Implant
ENT: outpatient care in an institute for deaf patients

ENT: teaching of sign language to deaf patients
ENT: treatment by audiologist
Feeding : nutrition, liquid food, high calories drink
Feeding : nutrition, liquid food, supplements like Nutridrink® or Fresubin®
Feeding : nutrition, milk substitute (low allergen amino-based compensation)
Feeding: fibre enriched tube feeding (like brands Nutrison®, Jevity Plus®)
Feeding: parenteral nutrition infusions: like glucose% fat emulsion% aminoplasmal%
Feeding: probiotic supplement, Saccharomyces boulardi, for gastrointestinal diseases (diarrhea)
Feeding: supplements for children for malnutrition
Feeding: tube feeding
Feeding: tube feeding/dietary supplements for children below 18 months
Feeding: tube feeding: senna (laxative like brand Senokot® syrup)
Feeding: tube feeding; dosage machine/pump
Feeding: tube feeding; replacement of the tube used in the jejunostoma
Feeding; enteral feeding by for example Peptamen or alternative
Feeding; parenteral feeding by venous catheter for children; Broviac
Feeding; phenylalanine-free nutrition (Such as: Anamix® or PKU milupa shake))
gastroenterological care/treatment such as Mic-key button feeding tube
gastroenterological care/treatment such as tube feeding (jejunal feeding tube)
gastroenterological care/treatment such as tube feeding (naso-gastric)
gastroenterological care/treatment such as tube feeding (PEG)
gastroenterological emergency treatment in case of rupture of esophageal varices
gastroenterology: enema
gastroenterology: percutaneous treatment of liver hydatid cysts (PEVAC)
geriatric care; 24/7 care in a nursing home
geriatric care; sheltered housing for elderly
Gynecology: Pap / cervical smear
hematology: blood transfusion
hematology: chelation therapy
hematology: clinical treatment in case of sickle cell crises
hematology: FFP replacements
hematology: phlebotomy / venipuncture / blood collection
hematology: plasmapheresis
hematology: platelets / thrombocytes transfusion
hematology: serologic testing of blood types (A, B, O, rhesus, +/-)
hematology: treatment with antithymocyte globulin
HIV / AIDS: ARV toxicity surveillance
home assistance / care at home by a nurse
home assistance / home care for blind people
home care by a nurse
Home treatment by nutritionist
Home treatment by physical therapist
hyperbaric oxygen therapy (HBOT)
inpatient treatment by a (intervention) radiologist
inpatient treatment by a allergologist
inpatient treatment by a cardiac surgeon
inpatient treatment by a cardiologist
inpatient treatment by a child psychologist

inpatient treatment by a dermatologist
inpatient treatment by a dietitian
inpatient treatment by a gastroenterologist
inpatient treatment by a geriatric specialist
inpatient treatment by a gynecologist
inpatient treatment by a hematologist
inpatient treatment by a hepatologist
inpatient treatment by a HIV specialist
inpatient treatment by an infectiologist
inpatient treatment by a microbiologist
inpatient treatment by a nephrologist
inpatient treatment by a neurologist
inpatient treatment by a neurosurgeon
inpatient treatment by a pediatric anaesthesiologist
inpatient treatment by a pediatric cardiac surgeon
inpatient treatment by a pediatric cardiologist
inpatient treatment by a -pediatric- ear nose and throat (ENT) specialist
inpatient treatment by a pediatric gastroenterologist
inpatient treatment by a pediatric nephrologist
inpatient treatment by a pediatric neurologist
inpatient treatment by a pediatric ophthalmologist
inpatient treatment by a pediatric orthopedic surgeon
inpatient treatment by a pediatric physical therapist
inpatient treatment by a pediatric psychiatrist
inpatient treatment by a pediatric pulmonologist
inpatient treatment by a pediatric rheumatologist
inpatient treatment by a pediatric surgeon
inpatient treatment by a pediatric urologist
inpatient treatment by a pediatrician
inpatient treatment by a pediatrician specialized in metabolic diseases
inpatient treatment by a physical therapist
inpatient treatment by a plastic surgeon
inpatient treatment by a psychiatrist
inpatient treatment by a psychologist
inpatient treatment by a pulmonologist
inpatient treatment by a rehabilitation medicine specialist
inpatient treatment by a remedial educationalist
inpatient treatment by a remedial teacher
inpatient treatment by a rheumatologist
inpatient treatment by a surgeon
inpatient treatment by a thoracic surgeon
inpatient treatment by an anesthesiologist e.g. pain management
inpatient treatment by an ear nose and throat (ENT) specialist
inpatient treatment by an endocrinologist
inpatient treatment by an immunologist
inpatient treatment by an internal specialist (internist)
inpatient treatment by an obstetrician
inpatient treatment by an occupational therapist

inpatient treatment by an oncologist
inpatient treatment by an ophthalmologist
inpatient treatment by an oral / dental surgeon
inpatient treatment by an orthopedist / orthopedic surgeon
inpatient treatment by an Tuberculosis-specialist
inpatient treatment by an urologist
inpatient treatment by pediatric rehabilitation specialist
institutions / school for blind people
Intensive care treatment (ICU)
intravenous (drips) administration of medication on daily base
intravenous saline (NaCl) treatment
laboratory research / acid-base balance in blood and urine; e.g. serum and urine pH, electrolyte levels
Laboratory research / monitoring for CML by genetic molecular testing (PCR).
laboratory research / monitoring of full blood count; e.g. Hb, WBC & platelets
laboratory research / monitoring of PCR
Laboratory research :reticulocytes counting in blood
laboratory research for antibodies to the NMDA-R receptor
laboratory research for C-reactive protein (CRP)
laboratory research for creatinin kinase
Laboratory research for electrolytes; potassium, sodium, calcium and magnesium
laboratory research for serum copper and zinc levels
laboratory research for vitamin levels (like vit D)
laboratory research HIV : RNA test (=viral load)
laboratory research HIV: CD4 count
laboratory research HIV: viral load
laboratory research of Alfa-Fetoprotein
laboratory research of antibody hep. B surface antigen (anti Hbs)
laboratory research of bacterial cultures
laboratory research of blood count related to leukemia
laboratory research of blood glucose
laboratory research of blood glucose(incl: HbA1C/ glyc.Hb)
laboratory research of blood; INR e.g. in case of acenocoumarol anticlotting
laboratory research of cortisol levels in blood
laboratory research of HBV antibody in case of Hepatitis B
laboratory research of HBV DNA testing in case of Hepatitis B
laboratory research of HCV antibody in case of Hepatitis C
laboratory research of HCV RNA test [hepatitis C]
laboratory research of Hep B serology
laboratory research of IGF-1 serum concentrations
laboratory research of lipid profile (total cholesterol, HDL cholesterol, LDL cholesterol, triglycerides)
laboratory research of liver function (PT, albumin, bilirubin, transaminases: SGOT, SGPT etc.)
laboratory research of pancreas function (amylase, lipase)
laboratory research of renal/ kidney function (creatinin, ureum, proteinuria, sodium,potassium levels)
laboratory research of thyreoglobuline
laboratory research of thyroid functions (TSH, T3, T4)
laboratory research of viral load for Hep C
laboratory research related to leukemia: flow cytometry
laboratory research related to rheumatologic diseases (like RA, ANA, anti-CCP)

Laboratory research: alkaline phosphatase
Laboratory research: blood ACTH (Adrenocorticotropic Hormone) level
Laboratory research: coagulation tests
Laboratory research: coagulation tests: prothrombin time (PT)
laboratory research: e.g. testosterone level, sex hormone-binding globulin, free androgen index
Laboratory research: FSH and LH (gonadotropic hormones)
Laboratory research: GH (growth hormone/somatropin/HGH)
Laboratory research: medication level in the blood
Laboratory research: monitoring phenylalanine in the blood
Laboratory research: plasma and urinary osmolality
Laboratory research: Plasma antidiuretic hormone (ADH) level
Laboratory research: prolactin
Laboratory research: PTH, calcium, phosphate
laboratory research: resistance test for antiretroviral drugs
laboratory research: resistance test for tuberculosis drugs
Laboratory research: serum ferritin
Laboratory research: sputum smear microscopy (tuberculosis)
laboratory research: urine ; copper determination urine 24 hours
Laboratory research: urine specific gravity test
laboratory research: urine test for blood in urine/hematuria
laboratory research: urine test for glucose/glucosuria
laboratory research: urine test for proteinuria
Laboratory research: urine tests for opioids / amphetamines / cocaine / marihuana
laboratory research: viremia of hepatitis D + HBs Ag
laser treatment
laser treatment by dermatologist
medical device nephrology: materials; like nephrostomy catheter/tube
medical devices dermatology: compression stockings for varicose veins
medical devices dermatology: different types of bandages
medical devices ENT: patch for sealing tracheal stoma
medical devices ENT: speech prosthesis (like Provox or other)
medical devices gastroenterology: stoma materials with ostomy
medical devices internal medicine: blood glucose meter for self use by patient.
medical devices internal medicine: blood glucose self test strips for use by patient.
medical devices internal medicine: insulin pump
medical devices internal medicine: i-Port Advance
medical devices internal medicine: self-carried pump for subcutan. insulin infusion
medical devices nephrology: materials; nephrostomy catheter/tube
medical devices nephrology: materials; like tube and urine bag with nephrostomy
medical devices neurology: pediatric helmet
medical devices ophthalmology: contact lense
medical devices ophthalmology: glasses
medical devices ophthalmology: glaucoma drainage device
medical devices ophthalmology: glaucoma drainage device; Baerveldt
medical devices orthopedics: Becker hip abduction orthosis
medical devices orthopedics: Tübingen hip abduction orthosis
medical devices orthopedics: adapted corset seats for children
medical devices orthopedics: ankle-foot orthosis

medical devices orthopedics: crutches
medical devices orthopedics: lower and upper limb orthoses
medical devices orthopedics: orthopedic insoles
medical devices orthopedics: orthopedic shoes
medical devices orthopedics: Pavlik harness orthosis
medical devices orthopedics: spinal or corsetbrace
medical devices orthopedics: walking aid such as a walker or a cane
medical devices pulmonology pediatrics: Mucoclear® (6% NaCl solution) for nebulizer
medical devices pulmonology: cough assist machine (coughlator)
medical devices pulmonology: BiPAP therapy
medical devices pulmonology: BiPAP therapy for home use
medical devices pulmonology: breathing machines (ventilator, respirator etc)
medical devices pulmonology: CPAP maintenance and repair
medical devices pulmonology: CPAP therapy
medical devices pulmonology: CPAP therapy for home use
medical devices pulmonology: nebulizer
medical devices pulmonology: neonatal CPAP therapy
medical devices pulmonology: neonatal CPAP therapy for home use
medical devices pulmonology: oxygen therapy with device and nasal catheter
medical devices pulmonology: oxygen therapy with O2 pressure tank
medical devices pulmonology: phrenic stimulator (including check-up and maintenance)
medical devices pulmonology: spacer (with mask) for inhaler with asthma medication
medical devices urology: (adult) diapers
medical devices urology: indwelling urinary catheter like Foley catheter
medical devices urology: stoma materials with urostomy
medical devices urology: urine catheter
Medical devices urology; condom catheter
medical devices: (electric) profiling bed with costsides
medical devices: anti decubitus mattresses and cushions
medical devices: bath seat for patients in a wheel chair
medical devices: portable mucous suction
medical devices: wheelchair
medical devices; mobile hoist
medication in baxter; packed in daily doses
nephrology: acute hemodialysis
nephrology: chronic hemodialysis
nephrology: chronic hemodialysis (3 times a week)
nephrology: hemodialysis
nephrology: peritoneal dialysis
nephrology; Hemodiafiltration (combination of hemodialysis & hemofiltration)
neurology: implanted baclofen pump for release into spinal fluid
neurology: nerve conduction velocity test (NCV)
neurology: rehabilitation clinic with 24/7 care (e.g. after CVA or accident)
neurology: spinal puncture
neurology: vagal nerve stimulation (VNS) incl. implantation, repair and follow up
neurosurgery: deep brain stimulation incl. implantation, repair and follow up
neurosurgery: neurosurgical treatment of epilepsy
neurosurgery: Placement of cerebral shunt including pre- and after care

neurosurgery: stereotactic radiosurgery/ radiation e.g. with Linea Gamma Knife
nursing home physician
oncology: allogeneic stem cell transplantation, including pre- and aftercare
oncology: autologous stem cell transplantation, including pre- and aftercare
oncology: Carbon ion radiotherapy
oncology: chemotherapy
oncology: chemotherapy with ABVD
oncology: cryosurgery (also called cryotherapy)
oncology: Cyber Knife Radiosurgery
oncology: Gamma Knife Radiosurgery
oncology: Hyperthermia Cancer Treatment
oncology: immunotherapy
oncology: immunotherapy; donor lymphocyte (or leukocyte) infusion (DLI)
oncology: molecular radiotherapy
oncology: non-allogeneic stem cell transplantation, including pre- and aftercare
oncology: nuclear medicine
oncology: nuclear medicine: ¹⁷⁷Lutetium DOTATATE therapy
oncology: nuclear medicine: Iodine-131 metaiodobenzylguanidine (¹³¹I-MIBG) therapy
oncology: radiation therapy
oncology: terminal and palliative care
oncology; radioactive iodine therapy
Ophthalmology; intravitreal injections with medication
ophthalmology: eye prosthesis (delivery, placement and follow up)
ophthalmology: laser treatment of diabetic retinopathy
orthopedic surgery: MUTARS® -XPAND- growing prosthesis (incl follow up)
orthopedics. spine cement injection therapy(vertebroplasty)
outpatient care by social worker
outpatient treatment and follow up by a (intervention) radiologist
outpatient treatment and follow up by a allergologist
outpatient treatment and follow up by a cardiac surgeon
outpatient treatment and follow up by a cardiologist
outpatient treatment and follow up by a child psychologist
outpatient treatment and follow up by a cystoscopy
outpatient treatment and follow up by a dentist
outpatient treatment and follow up by a dermatologist
outpatient treatment and follow up by a dietitian
outpatient treatment and follow up by a gastroenterologist
outpatient treatment and follow up by a general practitioner
outpatient treatment and follow up by a geriatric specialist
outpatient treatment and follow up by a gynecologist
outpatient treatment and follow up by a hematologist
outpatient treatment and follow up by a hepatologist
outpatient treatment and follow up by a HIV specialist
outpatient treatment and follow up by a nephrologist
outpatient treatment and follow up by a neurologist
outpatient treatment and follow up by a neurosurgeon
outpatient treatment and follow up by a oesophago-gastro-duodenoscopy
outpatient treatment and follow up by a pediatric anaesthesiologist

outpatient treatment and follow up by a pediatric cardiac surgeon
outpatient treatment and follow up by a pediatric cardiologist
outpatient treatment and follow up by a -pediatric- ear nose and throat (ENT) specialist
Outpatient treatment and follow up by a pediatric gastroenterologist
outpatient treatment and follow up by a pediatric nephrologist
outpatient treatment and follow up by a pediatric neurologist
outpatient treatment and follow up by a pediatric ophthalmologist
outpatient treatment and follow up by a pediatric orthopedic surgeon
outpatient treatment and follow up by a pediatric physical therapist
outpatient treatment and follow up by a pediatric psychiatrist
Outpatient treatment and follow up by a pediatric pulmonologist
outpatient treatment and follow up by a pediatric rehabilitation specialist
outpatient treatment and follow up by a pediatric rheumatologist
outpatient treatment and follow up by a pediatric surgeon
outpatient treatment and follow up by a pediatric urologist
outpatient treatment and follow up by a pediatrician
outpatient treatment and follow up by a pediatrician specialized in metabolic diseases
outpatient treatment and follow up by a physical therapist
outpatient treatment and follow up by a plastic surgeon
outpatient treatment and follow up by a psychiatrist
outpatient treatment and follow up by a psychologist
outpatient treatment and follow up by a pulmonologist
outpatient treatment and follow up by a rehabilitation medicine specialist
outpatient treatment and follow up by a remedial educationalist
outpatient treatment and follow up by a remedial teacher
outpatient treatment and follow up by a rheumatologist
outpatient treatment and follow up by a speech therapist
outpatient treatment and follow up by a surgeon
outpatient treatment and follow up by a thoracic surgeon
outpatient treatment and follow up by a tuberculosis-specialist
outpatient treatment and follow up by a vascular surgeon
outpatient treatment and follow up by an anesthesiologist e.g. pain management
outpatient treatment and follow up by an ear nose and throat (ENT) specialist
outpatient treatment and follow up by an endocrinologist
outpatient treatment and follow up by an immunologist
outpatient treatment and follow up by an infectiologist
outpatient treatment and follow up by an internal specialist (internist)
outpatient treatment and follow up by an obstetrician
outpatient treatment and follow up by an occupational therapist
outpatient treatment and follow up by an oncologist
outpatient treatment and follow up by an ophthalmologist
outpatient treatment and follow up by an oral / dental surgeon
outpatient treatment and follow up by an orthodontist
outpatient treatment and follow up by an orthopedist / orthopedic surgeon
outpatient treatment and follow up by an orthoptist
outpatient treatment and follow up by an urologist
outpatient treatment care and follow up by an ostomy nurse
outpatient treatment, diagnostics and counseling by clinical geneticist

pediatric care / treatment, such as speech therapy
pediatric care such as special schooling
pediatric care, such as day care
pediatric care, such as multidisciplinary evaluation by a center for developmental disorders
pediatric care, such as special schooling for the mentally handicapped
physical therapy: lymph drainage therapy
physical therapy: supervised walking therapy (for claudication)
psychiatric clinical treatment (short term) by a psychiatrist
psychiatric clinical treatment for patient under 18 years of age
psychiatric clinical treatment in a closed ward/setting (not necessarily forced admittance)
psychiatric counseling / medication assistance by a psychiatric nurse
psychiatric crisis intervention in case of suicide attempt
psychiatric crisis intervention in case of suicide attempt including gastric lavage / stomach irrigation
psychiatric forced admittance in case necessary
psychiatric long term clinical treatment (e.g. for chronic psychotic patients) by a psychiatrist
psychiatric long term outpatient treatment by a Psychiatrist
psychiatric treatment by means of psychotherapy: e.g. cognitive behavioural therapy
psychiatric treatment by means of psychotherapy: other than cognitive behavioural therapy
psychiatric treatment in the form of day care
psychiatric treatment in the form of ECT (Electro Convulsive Therapy)
psychiatric treatment in the form of family therapy
psychiatric treatment in the form of family therapy (as inpatient or clinical treatment)
psychiatric treatment in the form of group therapy (target group of similar patients)
psychiatric treatment in the form of sheltered housing (e.g. for chronic psychotic patients)
psychiatric treatment of alcohol drug addiction in a specialized clinic (detox.))
psychiatric treatment of drug addiction in a specialized clinic (rehab.)
psychiatric treatment of drug addiction; e.g. outpatient care with methadone
psychiatric treatment of PTSD by means of cognitive behavioural therapy
psychiatric treatment of PTSD by means of EMDR
psychiatric treatment of PTSD by means of narrative exposure therapy
psychiatric treatment of PTSD: related to sexual violations
psychiatric treatment: assisted living / care at home by psychiatric nurse
psychiatric treatment; forensic psychiatry
psychiatry : home visits by psychiatrist
psychiatry: antipsychotic medication administration by injection (depot)
psychiatry: treatment of sexual problems (psychotherapy) by psychologist
pulmonology: assisted cough techniques; air stacking therapy and training
radiotherapy: radiation of Kaposi sarcoma
rehabilitation outpatient: physical therapy by a physical therapist
rehabilitation: long-term cardiac rehabilitation
rehabilitation: short-term cardiac rehabilitation
special clinic for epilepsy and/or specialist in epilepsy (e.g. neurologist, treatment for status epilepticus)
special clinic for epilepsy patients
specialist in pediatric HIV (in - and outpatient)
stem cell treatment
surgery : specifically endocrine surgery (eg for [para]thyroid carcinoma)
surgery : specifically orthopaedic surgery; hip replacement
surgery : specifically renal/kidney surgery

surgery : specifically surgery; parathyroidectomy with follow up
surgery : specifically venesection(s) for cytoreduction (e.g. in case of too high hemoglobin)
surgery, specifically craniofacial surgery
surgery, specifically ENT surgery: tracheotomy
surgery, specifically fundoplication surgery for gastro-oesophageal reflux disease
surgery, specifically ophthalmological surgery: laser treatment
surgery, specifically ophthalmological surgery
surgery, specifically ophthalmological surgery: lense implantation and vitrectomy
surgery, specifically oral & maxillofacial surgery
surgery, specifically orthopaedic surgery concerning a prosthetic knee
surgery, specifically orthopaedic surgery of the spine
surgery, specifically orthopaedic surgery: infiltration of joint with corticosteroids
surgery, specifically orthopaedic surgery: infiltration of joint with hyaluronic acid
surgery, specifically orthopaedic surgery: tibial head surgery for gonarthrosis
surgery, specifically orthopaedic surgery; arthroscopy (e.g. for meniscus)
surgery, specifically orthopaedic surgery; fibular transfer
surgery, specifically orthopaedic surgery; hand surgery
surgery, specifically orthopaedic surgery; knee; Eight-Plate procedure
surgery, specifically pediatric surgery
surgery, specifically reconstructive surgery by a plastic surgeon
surgery, specifically Transjugular Intrahepatic Portosystemic Shunt (TIPS)
surgery: CO2 laser surgery
surgery: specific gastrointestinal; (segmental) duodenal resection
surgery: specific gastrointestinal; correction/modification of a jejunostoma
surgery: specific gastrointestinal; Whipple operation/procedure
surgery: specifically gastrointestinal surgery
surgery: specifically gastrointestinal: to restore bile drainage
surgery: specifically gastrointestinal; bariatric surgery (weight loss)
surgery: specifically gynecological surgery; caesarean section (with complications like myoma)
surgery: specifically gynecological surgery; curettement/ curettage/excochleation
surgery: specifically gynecological surgery; laparoscopy
surgery: specifically oncological surgery
surgery: specifically orthopaedic surgery; knee replacement
surgery: specifically reconstructive surgery; larynx and trachea
surgery: specifically transgender operation incl pre- and after care
surgery: specifically urologic surgery
surgery: specifically vascular surgery
surgery: Splenectomy
surgery: vascular surgery; embolization procedure to stop a bleeding in or near the tumor or aneurysm
surgery; specifically gastrointestinal : colostomy operation and closure
surgery; specifically gastrointestinal; surgery of ileus
surgical placement of a shunt through jugular vein for hemodialysis
surgical placement of an arterial shunt for hemodialysis
transplantation aftercare: treatment of graft rejection
transplantation by allograft, including pre and aftercare
transplantation of bone marrow with autograft
transplantation of bone marrow including pre- and after care
transplantation of bone marrow including pre- and after care

transplantation of bone marrow with allograft
transplantation of cornea including all pre- and aftercare
transplantation of heart including all pre- and aftercare
transplantation of kidney including all pre- and aftercare
transplantation of liver including all pre- and aftercare
transplantation of lung(s) including all pre- and aftercare
transplantation of osteochondral, autologous, including all pre- and aftercare
transplantation of pancreas including pre- and aftercare
transplantation of skin including all pre- and aftercare
urology: diagnostics; check up by cystometry
urology: operative removal of kidney stones (general surgery)
urology: percutaneous nephrolithotomy (PCNL; operative removal of kidney stones)
urology: placement and follow up of ureter stents
urology: ureteroscopy and laser lithotripsy (LL; removal of kidney stones)
urology: urotherapist (nurse practitioner or physiotherapist specialized in child urology)
urology; extracorporeal shock wave lithotripsy (ESWL; removal of kidney stones)
urology; intra-uretral lithotripsy (with ureteroscopy and ultrasound) by local shock waves

List of Specialisms

General psychiatry
General Somatics
geriatrics
Guided community
Gynecology
hematology
hemodialysis
hepatology (liver diseases)
hiv/ aids
home/domiciliary care
Immunology
inpatient treatment by anesthesiologist
Insurance aspects
intensive care (unit) ICU
internal medicine
laboratory research
medication
nephrology (kidney diseases)
neurology
neurosurgery
nursing home
obstetrics
Occupational therapy (ergotherapy)
oncology
ophthalmology
Oral and dental surgery
Orthopedics
pediatric psychiatry
pediatrics and neonatology
physical therapy
plastic surgery
psychiatry
Pulmonology (lung diseases)
rehabilitation
Remedial Teaching
rheumatology
School for mentally handicapped children
School for the deaf and hard hearing
social work (welfare work)
speech therapy
surgery
transgender
transplantation surgery
urology
Vascular surgery
