Title: Provision of OSINT (Open-source intelligence) Reports on Migration

Description: The EUAA needs up-to-date information on a wide range of topics linked to asylum-related migration, to deliver situational awareness and early warning on the asylum situation in the EU+. The main objective of the contract is to obtain regular and high-quality open-source intelligence (OSINT) reports on migration that fulfil the specific needs of the EUAA and its stakeholders. These reports can avail themselves also of AI-input, but the contractor should ensure the use of high-quality sources, an accurate representation of the information collected and appropriate human oversight. EUAA reserves the right to duly assess against these benchmarks the products received. These reports should provide open-source information on selected themes related to different countries of origin and transit to supplement and enrich analyses on migration and the situation of asylum in the EU+. Reports may analyse specific countries of origin, specific countries of transit, specific nationalities in general terms or specific nationalities located in a selected transit country. The nature of these reports should not be purely descriptive, but analytical and forward-looking. To this end, the reports should provide an up-to-date overview of information relevant to selected topics.
