

## Asylum and Temporary Protection in the EU+ in the Context of the Russian Invasion of Ukraine Week 42 (17 – 23 October) 2022

26 October 2022

### Background

To ensure a timely situational picture after the Russian invasion in Ukraine, the EUAA has been monitoring the situation of asylum and temporary protection based on data collected and shared by EU+ countries under the framework of the EUAA’s Early warning and Preparedness System (EPS).<sup>1</sup> These data are provisional, unvalidated data and therefore might differ from validated data submitted at a later date to Eurostat (according to Regulation (EU) 2020/851 amending Regulation (EC) 862/2007). Unless otherwise stated, the analysis is based on EPS data. The numbers included in this report might also be subject to retroactive revisions.

### Almost 4.6 million registrations for temporary protection in EU+ countries so far<sup>2</sup>

From the beginning of the war to 23 October 2022, almost 4.6 million registrations for temporary protection of persons fleeing Ukraine have been made in the 29 EU+ countries.<sup>3</sup> According to UNHCR data, from the start of the invasion on 24 February to 18 October 2022, more than 14.3 million exits from Ukraine have occurred, among which 10.8 million were entries from Ukraine to the four EU neighbouring countries.<sup>4</sup> During this period, there have been about 6.9 million entries to Ukraine from Poland, Romania, Slovakia and Moldova, which includes also back-and-forth movements. Within Ukraine, 6.2 million persons were internally displaced as of 26 September, according to IOM.<sup>5</sup>

### At least 51 546 registrations for temporary protection in week 42

In week 42, at least 51 546 registrations for temporary protection were made in 28 reporting countries.<sup>6</sup> The number of registrations increased significantly from week 41 (Fig. 1) but remained in line with fluctuations over the nine previous weeks (between 45 800 and 59 700).

At least 96 % (49 372) of the registrations for temporary protection in week 42 concerned Ukrainian nationals (but for some 3 % the citizenship could not be reported). The most prominent other nationalities were Russians (145), Azerbaijanis (73) and Moroccans (56). Some 60 % of the registered persons were female but for about 3 % the sex was not reported.

The Council of the EU had adopted an implementing decision activating the temporary protection directive (TPD or

**Note:** Totals for weeks 40-42 were not fully available.

2001/55/EC) on 4 March 2022.<sup>7</sup> It envisaged protection for Ukrainian nationals, some categories of third-country nationals and stateless persons who were residing in Ukraine before the Russian invasion. EU+ countries adopted national legislation to implement the directive.<sup>8</sup> Registrations included in this analysis cover both those conducted under the TPD and similar provisions under national law.

### Stable number of asylum applications lodged by Ukrainians

In week 42, Ukrainians lodged 264 asylum applications in the EU+, roughly as many as in week 41.<sup>9</sup> Since late May, applications have fluctuated between 200 and 340 (Fig. 2). In total, Ukrainian nationals have lodged about 26 900 applications for asylum in EU+ countries from 21 February to 23 October 2022.
